| BMI:Gewicht ok | 20.7 |

Features

The fitness scale is ideal for use in fitness studios, pharmacies, nutrition counselling and wellness hotels. With its body analysis function, in addition to weight and body mass index, the muscle, fat and water content can also be measured precisely and the current energy metabolism can be determined. The measurement is taken by hand, so that the user can stand on the scales comfortably and save time while wearing shoes. Compared to currently known analysis scales, the scale is particularly easy to use and does not require complicated and detailed instructions. With the integrated printer, the weight and analysis values including individual evaluation can be conveniently printed out, documented and easily tracked over a longer period of time.

- ▶ Measurement of muscle, fat and water components in the body
- ▶ Impedance measurement via the hands, no need to take off the shoes
- ▶ Large LCD display
- ▶ Indication of time in standby mode
- ▶ Simple self-explanatory menu guide on the glass surface
- ▶ No limit on measurement for over- and underweight people
- ▶ Clothing weight value seasonally adjustable
- ▶ Automatic data printout of the analysis measurements
- ▶ Company information on printout individually adjustable with included software
- ▶ Optional: Company information on printout individually adjustable prior to delivery (see accessories)
- ▶ Extra large platform: 320 x 400 mm
- ▶ No assembly required - the scale is immediately ready for use
- ▶ Energy saving auto-off function
- ▶ Switchable to kg / st / lb units
- ▶ Mains operation
