

**SPECIFICATIONS**  
**ROMED MOIST PATIENT WIPES**  
**WITH ALOE VERA**  
**REF: MPW-A**

*Cosmetic conform Regulation (EC) No 1223/2009*

This is a product intended for professional use.

Romed moist patient wipes replace soap and water. Very easy to use in hospitals and home care. The wipe can be used for every part of the body, but not suitable for the eyes. After use the wipe can be easily disposed.

The (single) wipes can be warmed in the microwave oven before use (30 seconds at 600 Watt).

Romed moist patient wipes are not sterile, but the pack is sealed properly.

The wipes will remain in good condition 3-6 months after opening if care is taken to reseal the inner label and closing of the plastic lids well after opening of the pack.

The wipe is not recommended for use on new-born babies because of their ultra-sensitive skin.

Material: Spunlace nonwoven fabric (impregnated)  
Composition: 20% Viscose, 80% Polyester  
Weight: 40 g/m<sup>2</sup>  
Size wipe: 17.5 cm x 33 cm (unfolded)  
Colour: White  
pH: 4.5 – 5.5

## Ingredients
