Re: Medical contact Materials Declaration
Item: Wooden Tongue Depressors

The above items are suitable for direct medical contact and will not introduce into the packed product any substance injurious to health or which might otherwise lead to infringement of all current legislation as amended, concerning medical and packaging as in force in the following countries.
UK, New Zealand, Australia , United States(FDA 21 CFR Part 174.5) and Japan.

The minimum service temperature acceptable to the tongue depressors will exceed minus 45 deg C. Integrity and properties of the tongue depressors will remain substantially unchanged over a prolonged period of time, up to 24 months at around the typical storage level of Minus 25 deg C.

Tonguedepressors are packed in medical grade cartons.

For any futher information please feel free to contact me 008618603645980.

Cheers
